

Yinlun Setrab Poland designs and manufactures customised aluminium radiators and heat exchangers. We supply many of the world's premium car brands, e.g. Audi, Bentley, Ferrari, Lamborghini, BMW, Jaguar Land Rover, McLaren, and Mercedes. At our headquarter in Malmö we are focusing on customer project development, management systems development, purchasing and production management. In Karlino, Poland, we have one, and soon two plants where most of our manufacturing takes place.

Come join us!

Do you want to be part of our expanding, innovative and international company? Yinlun Setrab Poland is growing and we need more brilliant minds to join us. Our work climate is open and supportive. We believe that our success comes from working together in cross-functional teams where everyone is accountable. We are now hiring:

Process & Manufacturing Engineer (Plastic injection)

Your role

Our company is growing and we are in the process of building a second plant in Poland, expanding our production capacity. For our new plant we are looking for a Process & Manufacturing Engineer. Our first big project will be HVAC-production with a semi-automated assembly line for one of our premium automotive customers. You will, together with the rest of the team, take responsibility for the production lines and focus on plastic injection.

Your duties will include, among other things:

- Develop and implement manufacturing flow lines and workstation layouts, which optimize product quality and process stability. Focus on plastic injection.
- Implement process automation for new launch projects by using engineering techniques such as DFM / DFA (Design for Manufacturability and Assembly), FMEA and Lean Methodology.
- Serve as a resource for cause/effect analyses, investigations, statistical studies and corrective action planning.
- Contribute to continuous improvement activities.

Who are you?

We are looking for someone with a university degree in mechanical engineering. You are a flexible, motivated and solution-focused person. You can create trust and has a collaborative approach towards others. You work in a methodical and structured manner and are keen to learn and develop.

Requirements

- Technical university degree, e.g. Manufacturing, Electrical or Mechatronics Engineer.

- Experience as manufacturing engineer within plastic injection, ideally in the automotive industry.
- Background of PLC programming, Robotic and Vision Camera systems is an advantage.
- Knowledge of methods such as FMEA, DFM/DFA, Six Sigma and Lean manufacturing.
- Strong analytical and problem-solving skills.
- Be able to work efficiently in a team environment but also independently.
- Willingness to travel, good command of Polish and English (verbal and written).

About Yinlun Setrab Poland

Our company is in an exciting and expansive phase. We are part of the listed Chinese company Yinlun with heat exchanger operations in China, Europe, US and India. We are a well-functioning and close-knit team, proud of our competence and our drive. We have short decision paths and believe that we achieve success by working together. We value openness and good development opportunities for our employees. Read more about our company and our business at setrab.com.
