

Yinlun Setrab Poland designs and manufactures customised aluminium radiators and heat exchangers. We supply many of the world's premium car brands, e.g. Audi, Bentley, Ferrari, Lamborghini, BMW, Jaguar Land Rover, McLaren, and Mercedes. At our headquarter in Malmö we are focusing on customer project development, management systems development, purchasing and production management. In Karlino, Poland, we have one, and soon two plants where most of our manufacturing takes place.

Come join us!

Do you want to be part of our expanding, innovative and international company? Yinlun Setrab Poland is growing and we need more brilliant minds to join us. Our work climate is open and supportive. We believe that our success comes from working together in cross-functional teams where everyone is accountable. We are now hiring:

Equipment Engineer

Your role

Our company is growing and we are in the process of building a second plant in Poland, expanding our production capacity. For our new plant we are looking for an Equipment Engineer. Our first big project will be HVAC-production with a semi-automated line for one of our premium automotive customers. Your responsibility will be, together with the rest of the team, to have an over-all responsibility to assure that the machine set-up run to its maximum efficiency and output. You will be an interface between the process engineers and the maintenance department.

Your duties will include, among other things:

- Assist in the work with developing and implement manufacturing flow lines to optimize product quality and process stability.
- Running an efficient maintenance operation which makes it possible to fulfil operational and customer demand and meet set targets. This includes focusing on preventive maintenance and managing breakdowns.
- Be part of the daily work with follow-up, initiation of solutions to problems, nonconformities and improvements.
- Work within 5S-methodology to maintain workplace to a high standard.
- Contribute to continuous improvement activities.

Who are you?

We are looking for someone with a university degree in mechanical engineering. You are a flexible, motivated and solution-focused person. You can create trust and has a collaborative approach towards others. You work in a methodical and structured manner and are keen to learn and develop.

Requirements

- Bachelor's degree in mechanical engineering, or equivalent competence.
- Experience in a similar role within manufacturing industry, preferably in the automotive industry.
- Knowledge and understanding of semi-automated lines.
- Strong analytical and problem-solving skills.
- Be able to work efficiently in a team environment but also independently.
- Willingness to travel, good command of Polish and English (verbal and written).

About Yinlun Setrab Poland
